User Stories

Client
- I want an easy way to log on to the website so that I don't have to type in too much information to access the website.
- I want a way to answer questions that I do not have a definite answer on.
- I want to use the website to obtain the status of my organisation's health.
- I want to know how I can improve my organisation's state of health.
- I want to have a visually pleasing result that I can easily understand.
- I would like to know how my organisational health has increased or decreased in different aspects over time.

HIHO workshop team
- We want to be able to have the results of a client organisation so that we can advise the client on how they can improve their organisational health.
- We need a visually pleasing document on each of the clients' response so that we can easily identify what the client problem areas.

- We need to know how many days have passed since a client completed the questionnaire, so we know which Client to tend to first.

- We need to see if the client has completed the full questionnaire so that we know which client is currently waiting for a response from us.

HIHO administrator
- I need a record of all companies registered with us for us to be able to manage them.

- I need to have the details of all our clients for us to be able to contact them.

- I need our own unique login key that'll give us access as administrators of the system so that we have a way of managing the clients better.

- I need to be able to track the history of our client's interaction with the website, to allow me to schedule the next workshop appropriately.
